StyleIQ Screen Guide

Screen-by-screen purpose and functional reference for al.html

123 screens • Edition: 26 August 2026

This guide reflects the current screen definitions and flows in al.html. Inventory order is not always the same as navigation order.

Section directory

The file groups the experience into 14 functional areas, from welcome through Muse. The table shows each ID range, screen count, and overall role.

Section	Range	Count	Role
Welcome & Walkthrough	S-00 – S-02	3	Brand entry and first-use orientation.
Authentication & First Use	A-01 – A-15	15	Account setup and initial preference signals.
Import & Closet Creation	B-01 – B-11	11	Item intake and Closet creation.
Closet	C-01 – C-07	7	Browse, edit, and style owned items.
Today & Daily Styling	D-01 – D-06	6	Daily recommendations based on context.
Outfit Actions	E-01 – E-06	6	Save, edit, share, try on, or reject a Look.
Style Studio / Canvas	F-01 – F-11	11	Editable outfit canvas and piece management.
Saved Looks	G-01 – G-08	8	Saved Look library and metadata.
Style Twin & Virtual Try-On	H-01 – H-10	10	Style Twin setup and private rendering.
Planner & Events	I-01 – I-06	6	Calendar and event-based Look planning.
Trips	J-01 – J-14	14	Trip, packing, and daily-Look planning.
Discover & Community	K-01 – K-08	8	Discover, search, and community actions.
Profile & Settings	L-01 – L-15	15	Profile, preferences, privacy, and support.
Muse Stylist	M-01 – M-03	3	Muse prompts, explanations, and wardrobe insights.

S — Welcome & Walkthrough

Introduces the StyleIQ proposition and lets the user enter the app or begin account setup.

S-00 StyleIQ splash

Purpose: Editorial brand introduction and the first app entry point.

Functional role: This screen implements part of the Welcome & Walkthrough capability. Introduces the StyleIQ proposition and lets the user enter the app or begin account setup.

Journey context: Inventory adjacency: section start before it and S-01 after it. This is documentation order, not necessarily a direct user-flow dependency.

S-01 Meet Muse

Purpose: Introduce the personal stylist and preview what StyleIQ can do.

Functional role: This screen implements part of the Welcome & Walkthrough capability. Introduces the StyleIQ proposition and lets the user enter the app or begin account setup.

Journey context: Inventory adjacency: S-00 before it and S-02 after it. This is documentation order, not necessarily a direct user-flow dependency.

S-02 Who are we styling?

Purpose: Choose the wardrobe StyleIQ should personalize before account setup.

Functional role: This screen implements part of the Welcome & Walkthrough capability. Introduces the StyleIQ proposition and lets the user enter the app or begin account setup.

Journey context: Inventory adjacency: S-01 before it and section end after it. This is documentation order, not necessarily a direct user-flow dependency.

A — Authentication & First Use

Collects first-use account and preference signals while keeping optional personalization skippable.

A-01 Sign up or sign in

Purpose: Google, Apple, and Email account access.

Functional role: This screen implements part of the Authentication & First Use capability. Collects first-use account and preference signals while keeping optional personalization skippable.

Journey context: Inventory adjacency: section start before it and A-02 after it. This is documentation order, not necessarily a direct user-flow dependency.

A-02 Create account • Name

Purpose: First and last name with OAuth prefill.

Functional role: This screen implements part of the Authentication & First Use capability. Collects first-use account and preference signals while keeping optional personalization skippable.

Journey context: Inventory adjacency: A-01 before it and A-03 after it. This is documentation order, not necessarily a direct user-flow dependency.

A-03 Email sign-up

Purpose: Account email used for sign-in and shopping receipt recognition.

Functional role: This screen implements part of the Authentication & First Use capability. Collects first-use account and preference signals while keeping optional personalization skippable.

Journey context: Inventory adjacency: A-02 before it and A-04 after it. This is documentation order, not necessarily a direct user-flow dependency.

A-04 Verify email • OTP

Purpose: Six-digit OTP, resend, error, and verification state.

Functional role: This screen implements part of the Authentication & First Use capability. Collects first-use account and preference signals while keeping optional personalization skippable.

Journey context: Inventory adjacency: A-03 before it and A-05 after it. This is documentation order, not necessarily a direct user-flow dependency.

A-05 Profile setup • Occupation

Purpose: Suggested roles plus searchable free entry.

Functional role: This screen implements part of the Authentication & First Use capability. Collects first-use account and preference signals while keeping optional personalization skippable.

Journey context: Inventory adjacency: A-04 before it and A-06 after it. This is documentation order, not necessarily a direct user-flow dependency.

A-06 Wardrobe preference

Purpose: Womenswear, Menswear, or both.

Functional role: This screen implements part of the Authentication & First Use capability. Collects first-use account and preference signals while keeping optional personalization skippable.

Journey context: Inventory adjacency: A-05 before it and A-07 after it. This is documentation order, not necessarily a direct user-flow dependency.

A-07 Style Twin introduction

Purpose: Virtual try-on education with Continue or Skip.

Functional role: This screen implements part of the Authentication & First Use capability. Collects first-use account and preference signals while keeping optional personalization skippable.

Journey context: Inventory adjacency: A-06 before it and A-08 after it. This is documentation order, not necessarily a direct user-flow dependency.

A-08 Style Twin photo setup

Purpose: Separate private face and body photos.

Functional role: This screen implements part of the Authentication & First Use capability. Collects first-use account and preference signals while keeping optional personalization skippable.

Journey context: Inventory adjacency: A-07 before it and A-09 after it. This is documentation order, not necessarily a direct user-flow dependency.

A-09 How did you hear about us?

Purpose: TikTok, Instagram, Reddit, Friend, ChatGPT, Google, YouTube, Other.

Functional role: This screen implements part of the Authentication & First Use capability. Collects first-use account and preference signals while keeping optional personalization skippable.

Journey context: Inventory adjacency: A-08 before it and A-10 after it. This is documentation order, not necessarily a direct user-flow dependency.

A-10 Style preferences • Brands

Purpose: Search and heart at least three brands.

Functional role: This screen implements part of the Authentication & First Use capability. Collects first-use account and preference signals while keeping optional personalization skippable.

Journey context: Inventory adjacency: A-09 before it and A-11 after it. This is documentation order, not necessarily a direct user-flow dependency.

A-11 First-run Today

Purpose: One-piece promise and primary Add action.

Functional role: This screen implements part of the Authentication & First Use capability. Collects first-use account and preference signals while keeping optional personalization skippable.

Journey context: Inventory adjacency: A-10 before it and A-12 after it. This is documentation order, not necessarily a direct user-flow dependency.

A-12 Closet import introduction

Purpose: Before and after Prettify education.

Functional role: This screen implements part of the Authentication & First Use capability. Collects first-use account and preference signals while keeping optional personalization skippable.

Journey context: Inventory adjacency: A-11 before it and A-13 after it. This is documentation order, not necessarily a direct user-flow dependency.

A-13 Empty Closet

Purpose: Reassurance and Add to Closet.

Functional role: This screen implements part of the Authentication & First Use capability. Collects first-use account and preference signals while keeping optional personalization skippable.

Journey context: Inventory adjacency: A-12 before it and A-14 after it. This is documentation order, not necessarily a direct user-flow dependency.

A-14 Empty Saved Looks

Purpose: Explain saved outfits.

Functional role: This screen implements part of the Authentication & First Use capability. Collects first-use account and preference signals while keeping optional personalization skippable.

Journey context: Inventory adjacency: A-13 before it and A-15 after it. This is documentation order, not necessarily a direct user-flow dependency.

A-15 Empty Trips

Purpose: Explain planning, packing, and travel Looks.

Functional role: This screen implements part of the Authentication & First Use capability. Collects first-use account and preference signals while keeping optional personalization skippable.

Journey context: Inventory adjacency: A-14 before it and section end after it. This is documentation order, not necessarily a direct user-flow dependency.

B — Import & Closet Creation

Turns photos, searches, or receipts into confirmed Closet items with editable metadata.

B-01 Global Add sheet

Purpose: Photos, Search items, Forward receipts.

Functional role: This screen implements part of the Import & Closet Creation capability. Turns photos, searches, or receipts into confirmed Closet items with editable metadata.

Journey context: Inventory adjacency: section start before it and B-02 after it. This is documentation order, not necessarily a direct user-flow dependency.

Flow note: Primary entry from the Closet Add button; branches to Photos (B-02), Search (B-04), or Receipt Forwarding (B-09).

B-02 Photo picker

Purpose: Multi-image selection and enhancement.

Functional role: This screen implements part of the Import & Closet Creation capability. Turns photos, searches, or receipts into confirmed Closet items with editable metadata.

Journey context: Inventory adjacency: B-01 before it and B-03 after it. This is documentation order, not necessarily a direct user-flow dependency.

B-03 Prettify guide

Purpose: Real photo to isolated studio item.

Functional role: This screen implements part of the Import & Closet Creation capability. Turns photos, searches, or receipts into confirmed Closet items with editable metadata.

Journey context: Inventory adjacency: B-02 before it and B-04 after it. This is documentation order, not necessarily a direct user-flow dependency.

B-04 Import search

Purpose: Keyword or product URL.

Functional role: This screen implements part of the Import & Closet Creation capability. Turns photos, searches, or receipts into confirmed Closet items with editable metadata.

Journey context: Inventory adjacency: B-03 before it and B-05 after it. This is documentation order, not necessarily a direct user-flow dependency.

B-05 Search results

Purpose: Image, title, source, brand.

Functional role: This screen implements part of the Import & Closet Creation capability. Turns photos, searches, or receipts into confirmed Closet items with editable metadata.

Journey context: Inventory adjacency: B-04 before it and B-06 after it. This is documentation order, not necessarily a direct user-flow dependency.

B-06 Confirmation

Purpose: Editable metadata, Prettify, Add, Add All.

Functional role: This screen implements part of the Import & Closet Creation capability. Turns photos, searches, or receipts into confirmed Closet items with editable metadata.

Journey context: Inventory adjacency: B-05 before it and B-07 after it. This is documentation order, not necessarily a direct user-flow dependency.

B-07 Prettifying

Purpose: Disabled Add with visible metadata.

Functional role: This screen implements part of the Import & Closet Creation capability. Turns photos, searches, or receipts into confirmed Closet items with editable metadata.

Journey context: Inventory adjacency: B-06 before it and B-08 after it. This is documentation order, not necessarily a direct user-flow dependency.

B-08 Result

Purpose: Processed image, Retry, Add.

Functional role: This screen implements part of the Import & Closet Creation capability. Turns photos, searches, or receipts into confirmed Closet items with editable metadata.

Journey context: Inventory adjacency: B-07 before it and B-09 after it. This is documentation order, not necessarily a direct user-flow dependency.

B-09 Receipt forwarding

Purpose: Personalized forwarding instructions.

Functional role: This screen implements part of the Import & Closet Creation capability. Turns photos, searches, or receipts into confirmed Closet items with editable metadata.

Journey context: Inventory adjacency: B-08 before it and B-10 after it. This is documentation order, not necessarily a direct user-flow dependency.

B-10 Draft imports

Purpose: Persistent unresolved-draft counter.

Functional role: This screen implements part of the Import & Closet Creation capability. Turns photos, searches, or receipts into confirmed Closet items with editable metadata.

Journey context: Inventory adjacency: B-09 before it and B-11 after it. This is documentation order, not necessarily a direct user-flow dependency.

B-11 Success

Purpose: Toast, Closet update, Home transformation.

Functional role: This screen implements part of the Import & Closet Creation capability. Turns photos, searches, or receipts into confirmed Closet items with editable metadata.

Journey context: Inventory adjacency: B-10 before it and section end after it. This is documentation order, not necessarily a direct user-flow dependency.

C — Closet

Lets the user browse, inspect, edit, and style the items they own or have saved.

C-01 Closet grid

Purpose: Closet/Wishlist, sort, filters, categories.

Functional role: This screen implements part of the Closet capability. Lets the user browse, inspect, edit, and style the items they own or have saved.

Journey context: Inventory adjacency: section start before it and C-02 after it. This is documentation order, not necessarily a direct user-flow dependency.

C-02 Item detail

Purpose: Hero image and editable metadata.

Functional role: This screen implements part of the Closet capability. Lets the user browse, inspect, edit, and style the items they own or have saved.

Journey context: Inventory adjacency: C-01 before it and C-03 after it. This is documentation order, not necessarily a direct user-flow dependency.

C-03 Image tools

Purpose: Crop and Prettify/Retry.

Functional role: This screen implements part of the Closet capability. Lets the user browse, inspect, edit, and style the items they own or have saved.

Journey context: Inventory adjacency: C-02 before it and C-04 after it. This is documentation order, not necessarily a direct user-flow dependency.

C-04 Core metadata

Purpose: Brand, name, category, colors, seasons, fit, tags, price.

Functional role: This screen implements part of the Closet capability. Lets the user browse, inspect, edit, and style the items they own or have saved.

Journey context: Inventory adjacency: C-03 before it and C-05 after it. This is documentation order, not necessarily a direct user-flow dependency.

C-05 Styling metadata

Purpose: Dress codes, lengths, fabrics, styling eligibility.

Functional role: This screen implements part of the Closet capability. Lets the user browse, inspect, edit, and style the items they own or have saved.

Journey context: Inventory adjacency: C-04 before it and C-06 after it. This is documentation order, not necessarily a direct user-flow dependency.

C-06 Intelligence

Purpose: Saved Looks, worn count, cost-per-wear.

Functional role: This screen implements part of the Closet capability. Lets the user browse, inspect, edit, and style the items they own or have saved.

Journey context: Inventory adjacency: C-05 before it and C-07 after it. This is documentation order, not necessarily a direct user-flow dependency.

C-07 Style this item

Purpose: Occasion families with selected item locked.

Functional role: This screen implements part of the Closet capability. Lets the user browse, inspect, edit, and style the items they own or have saved.

Journey context: Inventory adjacency: C-06 before it and section end after it. This is documentation order, not necessarily a direct user-flow dependency.

D — Today & Daily Styling

Produces context-aware daily outfit recommendations from weather, plans, and Closet data.

D-01 Before Closet data

Purpose: Import-first onboarding.

Functional role: This screen implements part of the Today & Daily Styling capability. Produces context-aware daily outfit recommendations from weather, plans, and Closet data.

Journey context: Inventory adjacency: section start before it and D-02 after it. This is documentation order, not necessarily a direct user-flow dependency.

D-02 After first item

Purpose: Weather and contextual stylist prompt.

Functional role: This screen implements part of the Today & Daily Styling capability. Produces context-aware daily outfit recommendations from weather, plans, and Closet data.

Journey context: Inventory adjacency: D-01 before it and D-03 after it. This is documentation order, not necessarily a direct user-flow dependency.

Flow note: Primary root screen after setup; opens Ask Muse (M-01), Style Twin (H-01), Style Studio (F-01), or Closet (C-01).

D-03 Loading

Purpose: Human recommendation wording.

Functional role: This screen implements part of the Today & Daily Styling capability. Produces context-aware daily outfit recommendations from weather, plans, and Closet data.

Journey context: Inventory adjacency: D-02 before it and D-04 after it. This is documentation order, not necessarily a direct user-flow dependency.

D-04 Outfit families

Purpose: Business casual, party, dressy, professional, semi-formal.

Functional role: This screen implements part of the Today & Daily Styling capability. Produces context-aware daily outfit recommendations from weather, plans, and Closet data.

Journey context: Inventory adjacency: D-03 before it and D-05 after it. This is documentation order, not necessarily a direct user-flow dependency.

D-05 Carousel

Purpose: Multiple variants per occasion.

Functional role: This screen implements part of the Today & Daily Styling capability. Produces context-aware daily outfit recommendations from weather, plans, and Closet data.

Journey context: Inventory adjacency: D-04 before it and D-06 after it. This is documentation order, not necessarily a direct user-flow dependency.

D-06 Missing category

Purpose: Explicit missing compatible item.

Functional role: This screen implements part of the Today & Daily Styling capability. Produces context-aware daily outfit recommendations from weather, plans, and Closet data.

Journey context: Inventory adjacency: D-05 before it and section end after it. This is documentation order, not necessarily a direct user-flow dependency.

E — Outfit Actions

Captures the user's response to a Look and routes it into saving, editing, sharing, or try-on.

E-01 Heart

Purpose: Save Look.

Functional role: This screen implements part of the Outfit Actions capability. Captures the user's response to a Look and routes it into saving, editing, sharing, or try-on.

Journey context: Inventory adjacency: section start before it and E-02 after it. This is documentation order, not necessarily a direct user-flow dependency.

E-02 Pencil

Purpose: Open Customize Outfit.

Functional role: This screen implements part of the Outfit Actions capability. Captures the user's response to a Look and routes it into saving, editing, sharing, or try-on.

Journey context: Inventory adjacency: E-01 before it and E-03 after it. This is documentation order, not necessarily a direct user-flow dependency.

E-03 Dislike

Purpose: Capture negative feedback.

Functional role: This screen implements part of the Outfit Actions capability. Captures the user's response to a Look and routes it into saving, editing, sharing, or try-on.

Journey context: Inventory adjacency: E-02 before it and E-04 after it. This is documentation order, not necessarily a direct user-flow dependency.

E-04 Send

Purpose: Open sharing flow.

Functional role: This screen implements part of the Outfit Actions capability. Captures the user's response to a Look and routes it into saving, editing, sharing, or try-on.

Journey context: Inventory adjacency: E-03 before it and E-05 after it. This is documentation order, not necessarily a direct user-flow dependency.

E-05 Create Avatar

Purpose: Open Try-On or Avatar gate.

Functional role: This screen implements part of the Outfit Actions capability. Captures the user's response to a Look and routes it into saving, editing, sharing, or try-on.

Journey context: Inventory adjacency: E-04 before it and E-06 after it. This is documentation order, not necessarily a direct user-flow dependency.

E-06 Swipe

Purpose: Move between alternatives.

Functional role: This screen implements part of the Outfit Actions capability. Captures the user's response to a Look and routes it into saving, editing, sharing, or try-on.

Journey context: Inventory adjacency: E-05 before it and section end after it. This is documentation order, not necessarily a direct user-flow dependency.

F — Style Studio / Canvas

Provides the editable outfit canvas where pieces, sources, context, and layout are managed.

F-01 Header

Purpose: Back, editable title, Save.

Functional role: This screen implements part of the Style Studio / Canvas capability. Provides the editable outfit canvas where pieces, sources, context, and layout are managed.

Journey context: Inventory adjacency: section start before it and F-02 after it. This is documentation order, not necessarily a direct user-flow dependency.

Flow note: Entered from Customize/Make it mine actions, saved Looks, and Muse formalization requests.

F-02 Flat lay

Purpose: Background-removed item composition.

Functional role: This screen implements part of the Style Studio / Canvas capability. Provides the editable outfit canvas where pieces, sources, context, and layout are managed.

Journey context: Inventory adjacency: F-01 before it and F-03 after it. This is documentation order, not necessarily a direct user-flow dependency.

F-03 Avatar entry

Purpose: Optional enhancement.

Functional role: This screen implements part of the Style Studio / Canvas capability. Provides the editable outfit canvas where pieces, sources, context, and layout are managed.

Journey context: Inventory adjacency: F-02 before it and F-04 after it. This is documentation order, not necessarily a direct user-flow dependency.

F-04 Context

Purpose: Feedback, calendar, date, location.

Functional role: This screen implements part of the Style Studio / Canvas capability. Provides the editable outfit canvas where pieces, sources, context, and layout are managed.

Journey context: Inventory adjacency: F-03 before it and F-05 after it. This is documentation order, not necessarily a direct user-flow dependency.

F-05 Category layer

Purpose: Carousel, hide/show, Add.

Functional role: This screen implements part of the Style Studio / Canvas capability. Provides the editable outfit canvas where pieces, sources, context, and layout are managed.

Journey context: Inventory adjacency: F-04 before it and F-06 after it. This is documentation order, not necessarily a direct user-flow dependency.

F-06 Add layer

Purpose: Open source selector.

Functional role: This screen implements part of the Style Studio / Canvas capability. Provides the editable outfit canvas where pieces, sources, context, and layout are managed.

Journey context: Inventory adjacency: F-05 before it and F-07 after it. This is documentation order, not necessarily a direct user-flow dependency.

F-07 Manual selector

Purpose: Closet/Wishlist, search, filters.

Functional role: This screen implements part of the Style Studio / Canvas capability. Provides the editable outfit canvas where pieces, sources, context, and layout are managed.

Journey context: Inventory adjacency: F-06 before it and F-08 after it. This is documentation order, not necessarily a direct user-flow dependency.

F-08 Multi-select layers

Purpose: Batch selection and management.

Functional role: This screen implements part of the Style Studio / Canvas capability. Provides the editable outfit canvas where pieces, sources, context, and layout are managed.

Journey context: Inventory adjacency: F-07 before it and F-09 after it. This is documentation order, not necessarily a direct user-flow dependency.

F-09 Provenance

Purpose: Owned versus shopping suggestion.

Functional role: This screen implements part of the Style Studio / Canvas capability. Provides the editable outfit canvas where pieces, sources, context, and layout are managed.

Journey context: Inventory adjacency: F-08 before it and F-10 after it. This is documentation order, not necessarily a direct user-flow dependency.

F-10 Missing item

Purpose: Visible placeholder and explanation.

Functional role: This screen implements part of the Style Studio / Canvas capability. Provides the editable outfit canvas where pieces, sources, context, and layout are managed.

Journey context: Inventory adjacency: F-09 before it and F-11 after it. This is documentation order, not necessarily a direct user-flow dependency.

F-11 Draft persistence

Purpose: Preserve title, items, context, ordering.

Functional role: This screen implements part of the Style Studio / Canvas capability. Provides the editable outfit canvas where pieces, sources, context, and layout are managed.

Journey context: Inventory adjacency: F-10 before it and section end after it. This is documentation order, not necessarily a direct user-flow dependency.

G — Saved Looks

Stores complete Looks and exposes their pieces, metadata, value, visibility, and activity.

G-01 Looks grid

Purpose: Sort, filter, Select, Lookbooks, Worn Looks.

Functional role: This screen implements part of the Saved Looks capability. Stores complete Looks and exposes their pieces, metadata, value, visibility, and activity.

Journey context: Inventory adjacency: section start before it and G-02 after it. This is documentation order, not necessarily a direct user-flow dependency.

G-02 Look detail

Purpose: Preview, caption, date, location, notes.

Functional role: This screen implements part of the Saved Looks capability. Stores complete Looks and exposes their pieces, metadata, value, visibility, and activity.

Journey context: Inventory adjacency: G-01 before it and G-03 after it. This is documentation order, not necessarily a direct user-flow dependency.

G-03 Items

Purpose: Owned and suggested pieces with Shop links.

Functional role: This screen implements part of the Saved Looks capability. Stores complete Looks and exposes their pieces, metadata, value, visibility, and activity.

Journey context: Inventory adjacency: G-02 before it and G-04 after it. This is documentation order, not necessarily a direct user-flow dependency.

G-04 Classification

Purpose: Tags, dress codes, seasons, styles.

Functional role: This screen implements part of the Saved Looks capability. Stores complete Looks and exposes their pieces, metadata, value, visibility, and activity.

Journey context: Inventory adjacency: G-03 before it and G-05 after it. This is documentation order, not necessarily a direct user-flow dependency.

G-05 Value

Purpose: Known total cost and unknown handling.

Functional role: This screen implements part of the Saved Looks capability. Stores complete Looks and exposes their pieces, metadata, value, visibility, and activity.

Journey context: Inventory adjacency: G-04 before it and G-06 after it. This is documentation order, not necessarily a direct user-flow dependency.

G-06 Visibility

Purpose: Private, followers, public.

Functional role: This screen implements part of the Saved Looks capability. Stores complete Looks and exposes their pieces, metadata, value, visibility, and activity.

Journey context: Inventory adjacency: G-05 before it and G-07 after it. This is documentation order, not necessarily a direct user-flow dependency.

G-07 Social metrics

Purpose: Likes, comments, restyles, sends.

Functional role: This screen implements part of the Saved Looks capability. Stores complete Looks and exposes their pieces, metadata, value, visibility, and activity.

Journey context: Inventory adjacency: G-06 before it and G-08 after it. This is documentation order, not necessarily a direct user-flow dependency.

G-08 Delete

Purpose: Destructive confirmation.

Functional role: This screen implements part of the Saved Looks capability. Stores complete Looks and exposes their pieces, metadata, value, visibility, and activity.

Journey context: Inventory adjacency: G-07 before it and section end after it. This is documentation order, not necessarily a direct user-flow dependency.

H — Style Twin & Virtual Try-On

Configures the optional private Style Twin and renders a Look on the user's visual reference.

H-01 Introduction

Purpose: Explain rendering saved Looks.

Functional role: This screen implements part of the Style Twin & Virtual Try-On capability. Configures the optional private Style Twin and renders a Look on the user's visual reference.

Journey context: Inventory adjacency: section start before it and H-02 after it. This is documentation order, not necessarily a direct user-flow dependency.

H-02 Face guidance

Purpose: Visible face, no other person.

Functional role: This screen implements part of the Style Twin & Virtual Try-On capability. Configures the optional private Style Twin and renders a Look on the user's visual reference.

Journey context: Inventory adjacency: H-01 before it and H-03 after it. This is documentation order, not necessarily a direct user-flow dependency.

H-03 Face upload

Purpose: Picker and processing.

Functional role: This screen implements part of the Style Twin & Virtual Try-On capability. Configures the optional private Style Twin and renders a Look on the user's visual reference.

Journey context: Inventory adjacency: H-02 before it and H-04 after it. This is documentation order, not necessarily a direct user-flow dependency.

H-04 Body reference

Purpose: Separate body photo.

Functional role: This screen implements part of the Style Twin & Virtual Try-On capability. Configures the optional private Style Twin and renders a Look on the user's visual reference.

Journey context: Inventory adjacency: H-03 before it and H-05 after it. This is documentation order, not necessarily a direct user-flow dependency.

H-05 Measurements

Purpose: Height and weight, metric/imperial.

Functional role: This screen implements part of the Style Twin & Virtual Try-On capability. Configures the optional private Style Twin and renders a Look on the user's visual reference.

Journey context: Inventory adjacency: H-04 before it and H-06 after it. This is documentation order, not necessarily a direct user-flow dependency.

H-06 Appearance

Purpose: Skin and hair color.

Functional role: This screen implements part of the Style Twin & Virtual Try-On capability. Configures the optional private Style Twin and renders a Look on the user's visual reference.

Journey context: Inventory adjacency: H-05 before it and H-07 after it. This is documentation order, not necessarily a direct user-flow dependency.

H-07 Pose

Purpose: Standing, leaning, phone, walking, random.

Functional role: This screen implements part of the Style Twin & Virtual Try-On capability. Configures the optional private Style Twin and renders a Look on the user's visual reference.

Journey context: Inventory adjacency: H-06 before it and H-08 after it. This is documentation order, not necessarily a direct user-flow dependency.

H-08 Tuck preference

Purpose: Tucked, untucked, no preference.

Functional role: This screen implements part of the Style Twin & Virtual Try-On capability. Configures the optional private Style Twin and renders a Look on the user's visual reference.

Journey context: Inventory adjacency: H-07 before it and H-09 after it. This is documentation order, not necessarily a direct user-flow dependency.

H-09 Usage limit

Purpose: Remaining generations and reset.

Functional role: This screen implements part of the Style Twin & Virtual Try-On capability. Configures the optional private Style Twin and renders a Look on the user's visual reference.

Journey context: Inventory adjacency: H-08 before it and H-10 after it. This is documentation order, not necessarily a direct user-flow dependency.

H-10 Result

Purpose: Render, feedback, save, retry.

Functional role: This screen implements part of the Style Twin & Virtual Try-On capability. Configures the optional private Style Twin and renders a Look on the user's visual reference.

Journey context: Inventory adjacency: H-09 before it and section end after it. This is documentation order, not necessarily a direct user-flow dependency.

I — Planner & Events

Connects dates and events to Closet items, saved Looks, and Muse-assisted planning.

I-01 Calendar month

Purpose: Month navigation, daily Add, today.

Functional role: This screen implements part of the Planner & Events capability. Connects dates and events to Closet items, saved Looks, and Muse-assisted planning.

Journey context: Inventory adjacency: section start before it and I-02 after it. This is documentation order, not necessarily a direct user-flow dependency.

I-02 Dashboard

Purpose: Streak, most-worn, Closet usage, journey.

Functional role: This screen implements part of the Planner & Events capability. Connects dates and events to Closet items, saved Looks, and Muse-assisted planning.

Journey context: Inventory adjacency: I-01 before it and I-03 after it. This is documentation order, not necessarily a direct user-flow dependency.

I-03 Day menu

Purpose: Closet, saved Looks, Plan Event.

Functional role: This screen implements part of the Planner & Events capability. Connects dates and events to Closet items, saved Looks, and Muse-assisted planning.

Journey context: Inventory adjacency: I-02 before it and I-04 after it. This is documentation order, not necessarily a direct user-flow dependency.

I-04 Add Event

Purpose: Title, date, repeat, dress code, items, notes.

Functional role: This screen implements part of the Planner & Events capability. Connects dates and events to Closet items, saved Looks, and Muse-assisted planning.

Journey context: Inventory adjacency: I-03 before it and I-05 after it. This is documentation order, not necessarily a direct user-flow dependency.

I-05 Validation

Purpose: Disabled Create until complete.

Functional role: This screen implements part of the Planner & Events capability. Connects dates and events to Closet items, saved Looks, and Muse-assisted planning.

Journey context: Inventory adjacency: I-04 before it and I-06 after it. This is documentation order, not necessarily a direct user-flow dependency.

I-06 Share Calendar

Purpose: Explicit sharing and privacy.

Functional role: This screen implements part of the Planner & Events capability. Connects dates and events to Closet items, saved Looks, and Muse-assisted planning.

Journey context: Inventory adjacency: I-05 before it and section end after it. This is documentation order, not necessarily a direct user-flow dependency.

J — Trips

Builds a trip from destinations and activities through packing, daily Looks, and sharing.

J-01 Trips list

Purpose: Empty state or destination cards.

Functional role: This screen implements part of the Trips capability. Builds a trip from destinations and activities through packing, daily Looks, and sharing.

Journey context: Inventory adjacency: section start before it and J-02 after it. This is documentation order, not necessarily a direct user-flow dependency.

J-02 Destination

Purpose: Autocomplete and date range.

Functional role: This screen implements part of the Trips capability. Builds a trip from destinations and activities through packing, daily Looks, and sharing.

Journey context: Inventory adjacency: J-01 before it and J-03 after it. This is documentation order, not necessarily a direct user-flow dependency.

J-03 Multi-city

Purpose: Additional destinations and dates.

Functional role: This screen implements part of the Trips capability. Builds a trip from destinations and activities through packing, daily Looks, and sharing.

Journey context: Inventory adjacency: J-02 before it and J-04 after it. This is documentation order, not necessarily a direct user-flow dependency.

J-04 Bag selection

Purpose: Carry on, checked, or both.

Functional role: This screen implements part of the Trips capability. Builds a trip from destinations and activities through packing, daily Looks, and sharing.

Journey context: Inventory adjacency: J-03 before it and J-05 after it. This is documentation order, not necessarily a direct user-flow dependency.

J-05 Must-have items

Purpose: Select owned required pieces.

Functional role: This screen implements part of the Trips capability. Builds a trip from destinations and activities through packing, daily Looks, and sharing.

Journey context: Inventory adjacency: J-04 before it and J-06 after it. This is documentation order, not necessarily a direct user-flow dependency.

J-06 Activities

Purpose: Location-aware suggestions plus free text.

Functional role: This screen implements part of the Trips capability. Builds a trip from destinations and activities through packing, daily Looks, and sharing.

Journey context: Inventory adjacency: J-05 before it and J-07 after it. This is documentation order, not necessarily a direct user-flow dependency.

J-07 Generation

Purpose: Human tips while packing.

Functional role: This screen implements part of the Trips capability. Builds a trip from destinations and activities through packing, daily Looks, and sharing.

Journey context: Inventory adjacency: J-06 before it and J-08 after it. This is documentation order, not necessarily a direct user-flow dependency.

J-08 Packing list

Purpose: Owned items grouped and editable.

Functional role: This screen implements part of the Trips capability. Builds a trip from destinations and activities through packing, daily Looks, and sharing.

Journey context: Inventory adjacency: J-07 before it and J-09 after it. This is documentation order, not necessarily a direct user-flow dependency.

J-09 Suggested items

Purpose: Shopping gaps and products.

Functional role: This screen implements part of the Trips capability. Builds a trip from destinations and activities through packing, daily Looks, and sharing.

Journey context: Inventory adjacency: J-08 before it and J-10 after it. This is documentation order, not necessarily a direct user-flow dependency.

J-10 Trip Looks

Purpose: One row per date.

Functional role: This screen implements part of the Trips capability. Builds a trip from destinations and activities through packing, daily Looks, and sharing.

Journey context: Inventory adjacency: J-09 before it and J-11 after it. This is documentation order, not necessarily a direct user-flow dependency.

J-11 Add Look menu

Purpose: Packing list, saved Looks, Ask Stylist.

Functional role: This screen implements part of the Trips capability. Builds a trip from destinations and activities through packing, daily Looks, and sharing.

Journey context: Inventory adjacency: J-10 before it and J-12 after it. This is documentation order, not necessarily a direct user-flow dependency.

J-12 Ask Stylist

Purpose: Context-aware prompt.

Functional role: This screen implements part of the Trips capability. Builds a trip from destinations and activities through packing, daily Looks, and sharing.

Journey context: Inventory adjacency: J-11 before it and J-13 after it. This is documentation order, not necessarily a direct user-flow dependency.

J-13 Sharing

Purpose: Shareable itinerary and packing list.

Functional role: This screen implements part of the Trips capability. Builds a trip from destinations and activities through packing, daily Looks, and sharing.

Journey context: Inventory adjacency: J-12 before it and J-14 after it. This is documentation order, not necessarily a direct user-flow dependency.

J-14 Edit/Delete

Purpose: Edit itinerary or confirm deletion.

Functional role: This screen implements part of the Trips capability. Builds a trip from destinations and activities through packing, daily Looks, and sharing.

Journey context: Inventory adjacency: J-13 before it and section end after it. This is documentation order, not necessarily a direct user-flow dependency.

K — Discover & Community

Supports discovery of Looks, creators, products, and community interactions.

K-01 Feed

Purpose: Dense image-led grid.

Functional role: This screen implements part of the Discover & Community capability. Supports discovery of Looks, creators, products, and community interactions.

Journey context: Inventory adjacency: section start before it and K-02 after it. This is documentation order, not necessarily a direct user-flow dependency.

K-02 Unified search

Purpose: People, products, Looks, brands.

Functional role: This screen implements part of the Discover & Community capability. Supports discovery of Looks, creators, products, and community interactions.

Journey context: Inventory adjacency: K-01 before it and K-03 after it. This is documentation order, not necessarily a direct user-flow dependency.

K-03 Filters

Purpose: For You, Top This Week, brands.

Functional role: This screen implements part of the Discover & Community capability. Supports discovery of Looks, creators, products, and community interactions.

Journey context: Inventory adjacency: K-02 before it and K-04 after it. This is documentation order, not necessarily a direct user-flow dependency.

K-04 Look detail

Purpose: Creator, location, image, items, metrics.

Functional role: This screen implements part of the Discover & Community capability. Supports discovery of Looks, creators, products, and community interactions.

Journey context: Inventory adjacency: K-03 before it and K-05 after it. This is documentation order, not necessarily a direct user-flow dependency.

K-05 Try on me

Purpose: Reuse Avatar gate.

Functional role: This screen implements part of the Discover & Community capability. Supports discovery of Looks, creators, products, and community interactions.

Journey context: Inventory adjacency: K-04 before it and K-06 after it. This is documentation order, not necessarily a direct user-flow dependency.

K-06 Restyle

Purpose: Copy community Look to editable draft.

Functional role: This screen implements part of the Discover & Community capability. Supports discovery of Looks, creators, products, and community interactions.

Journey context: Inventory adjacency: K-05 before it and K-07 after it. This is documentation order, not necessarily a direct user-flow dependency.

K-07 Follow/like/comment

Purpose: Representational social actions.

Functional role: This screen implements part of the Discover & Community capability. Supports discovery of Looks, creators, products, and community interactions.

Journey context: Inventory adjacency: K-06 before it and K-08 after it. This is documentation order, not necessarily a direct user-flow dependency.

K-08 Report

Purpose: Reason and confirmation.

Functional role: This screen implements part of the Discover & Community capability. Supports discovery of Looks, creators, products, and community interactions.

Journey context: Inventory adjacency: K-07 before it and section end after it. This is documentation order, not necessarily a direct user-flow dependency.

L — Profile & Settings

Manages the user's profile, learned preferences, privacy, support, and application settings.

L-01 Profile

Purpose: Photo, name, counts, member date.

Functional role: This screen implements part of the Profile & Settings capability. Manages the user's profile, learned preferences, privacy, support, and application settings.

Journey context: Inventory adjacency: section start before it and L-02 after it. This is documentation order, not necessarily a direct user-flow dependency.

L-02 Completion prompt

Purpose: Contextual and non-blocking.

Functional role: This screen implements part of the Profile & Settings capability. Manages the user's profile, learned preferences, privacy, support, and application settings.

Journey context: Inventory adjacency: L-01 before it and L-03 after it. This is documentation order, not necessarily a direct user-flow dependency.

L-03 Looks/Trips

Purpose: Switch output and planning.

Functional role: This screen implements part of the Profile & Settings capability. Manages the user's profile, learned preferences, privacy, support, and application settings.

Journey context: Inventory adjacency: L-02 before it and L-04 after it. This is documentation order, not necessarily a direct user-flow dependency.

L-04 About you

Purpose: Personal styling context.

Functional role: This screen implements part of the Profile & Settings capability. Manages the user's profile, learned preferences, privacy, support, and application settings.

Journey context: Inventory adjacency: L-03 before it and L-05 after it. This is documentation order, not necessarily a direct user-flow dependency.

L-05 Style preferences

Purpose: Prefer, Dislike, learned rules.

Functional role: This screen implements part of the Profile & Settings capability. Manages the user's profile, learned preferences, privacy, support, and application settings.

Journey context: Inventory adjacency: L-04 before it and L-06 after it. This is documentation order, not necessarily a direct user-flow dependency.

L-06 Brands

Purpose: Preferred/disliked with search.

Functional role: This screen implements part of the Profile & Settings capability. Manages the user's profile, learned preferences, privacy, support, and application settings.

Journey context: Inventory adjacency: L-05 before it and L-07 after it. This is documentation order, not necessarily a direct user-flow dependency.

L-07 Budget

Purpose: Per-item recommendation ranges.

Functional role: This screen implements part of the Profile & Settings capability. Manages the user's profile, learned preferences, privacy, support, and application settings.

Journey context: Inventory adjacency: L-06 before it and L-08 after it. This is documentation order, not necessarily a direct user-flow dependency.

L-08 Events

Purpose: Repeating styling events.

Functional role: This screen implements part of the Profile & Settings capability. Manages the user's profile, learned preferences, privacy, support, and application settings.

Journey context: Inventory adjacency: L-07 before it and L-09 after it. This is documentation order, not necessarily a direct user-flow dependency.

L-09 Avatar

Purpose: Private configuration and usage.

Functional role: This screen implements part of the Profile & Settings capability. Manages the user's profile, learned preferences, privacy, support, and application settings.

Journey context: Inventory adjacency: L-08 before it and L-10 after it. This is documentation order, not necessarily a direct user-flow dependency.

L-10 Auto-Prettify

Purpose: Automatically enhance uploads.

Functional role: This screen implements part of the Profile & Settings capability. Manages the user's profile, learned preferences, privacy, support, and application settings.

Journey context: Inventory adjacency: L-09 before it and L-11 after it. This is documentation order, not necessarily a direct user-flow dependency.

L-11 Standard settings

Purpose: Account, privacy, notifications, units, language.

Functional role: This screen implements part of the Profile & Settings capability. Manages the user's profile, learned preferences, privacy, support, and application settings.

Journey context: Inventory adjacency: L-10 before it and L-12 after it. This is documentation order, not necessarily a direct user-flow dependency.

L-12 Tutorial

Purpose: Stylist, add, style, save, feedback.

Functional role: This screen implements part of the Profile & Settings capability. Manages the user's profile, learned preferences, privacy, support, and application settings.

Journey context: Inventory adjacency: L-11 before it and L-13 after it. This is documentation order, not necessarily a direct user-flow dependency.

L-13 Notification settings

Purpose: Push, email, styling, social, and trip alerts.

Functional role: This screen implements part of the Profile & Settings capability. Manages the user's profile, learned preferences, privacy, support, and application settings.

Journey context: Inventory adjacency: L-12 before it and L-14 after it. This is documentation order, not necessarily a direct user-flow dependency.

L-14 Help center

Purpose: Guides, contact support, privacy, and account help.

Functional role: This screen implements part of the Profile & Settings capability. Manages the user's profile, learned preferences, privacy, support, and application settings.

Journey context: Inventory adjacency: L-13 before it and L-15 after it. This is documentation order, not necessarily a direct user-flow dependency.

L-15 Privacy & visibility

Purpose: Profile, Looks, Style Twin, data, and discovery controls.

Functional role: This screen implements part of the Profile & Settings capability. Manages the user's profile, learned preferences, privacy, support, and application settings.

Journey context: Inventory adjacency: L-14 before it and section end after it. This is documentation order, not necessarily a direct user-flow dependency.

M — Muse Stylist

Routes styling intents to recommendations, explanations, or evidence-based wardrobe insights.

M-01 Ask Muse

Purpose: Personal stylist hub with contextual quick prompts.

Functional role: This screen implements part of the Muse Stylist capability. Routes styling intents to recommendations, explanations, or evidence-based wardrobe insights.

Journey context: Inventory adjacency: section start before it and M-02 after it. This is documentation order, not necessarily a direct user-flow dependency.

Flow note: Entered from Today, My Atelier, or the side menu; each quick prompt should preserve its intent when routing.

M-02 Why this Look

Purpose: Explain the recommendation and continue to styling actions.

Functional role: This screen implements part of the Muse Stylist capability. Routes styling intents to recommendations, explanations, or evidence-based wardrobe insights.

Journey context: Inventory adjacency: M-01 before it and M-03 after it. This is documentation order, not necessarily a direct user-flow dependency.

Flow note: Entered from 'What should I wear today?', free-text Ask Muse, and 'Why this Look' actions. It currently represents a recommendation explanation.

M-03 Wardrobe gap

Purpose: Evidence-based Closet insight without duplicate shopping.

Functional role: This screen implements part of the Muse Stylist capability. Routes styling intents to recommendations, explanations, or evidence-based wardrobe insights.

Journey context: Inventory adjacency: M-02 before it and section end after it. This is documentation order, not necessarily a direct user-flow dependency.

Flow note: Independent branch, not a sequential successor to M-02. Entered from 'Find a wardrobe gap' in M-01, the Wishlist insight card in C-01, or 'See the wardrobe insight' in L-01.
